**1970 Maximum Muscle** Jun 23 2022 In 1970, the American muscle car was as fast and outrageous as it would ever get. But the end was nigh, and 1970 Maximum Muscle dives head-first into the storm before the

calm. Wherever you mark the beginning of the muscle car era—Oldsmobile's 1949 Rocket 88, Chrysler's 1951 FirePower engines, the 1964 Pontiac GTO—one thing is certain: in 1970, the era that had witnessed a parade of gloriously powerful, stylish, and brawny cars apt to make the hearts of even the most dispassionate squares go pitter-patter was sucking fumes. Gasoline shortages, skyrocketing fuel prices, insurance-industry bean counters, rising ecological concerns, and new, more fuel-efficient imports all conspired to consign the American muscle car to an ugly and unseemly denouement. Yet 1970 saw the actual zenith of the cars themselves, the year manufacturers pulled out all the stops and produced the most powerful and stunning machines the automotive world had ever seen. 1970 Maximum Muscle not only explores the factors that led to the decline of the most exciting era in the American automotive industry, it details some of the new models and model options that arguably made 1970 the climax of the muscle car era from engineering, styling, and cultural standpoints. As the war among GM, Ford, Chrysler, and AMC played out at dealerships, dragstrips, and drive-ins, ready-and-willing gearheads drove off dealer lots in potent behemoths like the Buick GSX, Oldsmobile 4-4-2, and Ford Torino Cobra. Muscle car stalwarts like the SS Chevelle, Pontiac GTO, and Plymouth 'Cuda became available with optional LS-6, Stage 1, and Hemi engines, respectively. Manufacturers ratcheted up the advertising hyperbole at the same time, offering performance packages with names like "Six-Pack," "Ram Air," and "Cobra Jet," while spoilers, scoops, hood tachometers, and decal packages were de rigueur. Meanwhile, on the popular SCCA Trans Am circuit, top drivers campaigned more nimble muscle off-the-rack cars like the Camaro Z/28 and Boss 302 Mustang. 1970 Maximum Muscle is an entertaining and rollicking look at the muscle car's peak year!

**Why We Took the Car** May 22 2022 Mike doesn't get why people think he's boring. Sure, he doesn't have many friends. (OK, zero friends.) And everyone laughs at him when he reads his essays out loud in class. And he's never invited to parties. But one day Tschick, the odd new boy at school, shows up at Mike's house out of the blue. He dares him to go on a road trip with him. No parents, no map, no destination. Will they get hopelessly lost in the middle of nowhere? Probably. **Always Crashing in the Same Car: On Art, Crisis, and Los Angeles, California** Jun 11 2021 "[An] absorbing and revealing book. . . nestling in the fruitful terrain between memoir and criticism." —Geoff Dyer, author of *Out of Sheer Rage* Blending memoir and cultural criticism, Matthew Specktor explores family legacy, the lives of artists, and a city that embodies both dreams and disillusionment. In 2006, Matthew Specktor moved into a crumbling Los Angeles apartment opposite the one in which F. Scott Fitzgerald spent the last moments of his life. Fitz had been Specktor's first literary idol, someone whose own passage through Hollywood had, allegedly, broken him. Freshly divorced, professionally flailing, and reeling from his mother's cancer diagnosis, Specktor was feeling unmoored. But rather than giving in or "cracking up," he embarked on an obsessive journey to make sense of the mythologies of "success" and "failure" that haunt the artist's life and the

American imagination. Part memoir, part cultural history, part portrait of place, *Always Crashing in the Same Car* explores Hollywood through a certain kind of collapse. It's a vibrant and intimate inspection of failure told through the lives of iconic, if under-sung, artists—Carole Eastman, Eleanor Perry, Warren Zevon, Tuesday Weld, and Hal Ashby, among others—and the author's own family history. Through this constellation of Hollywood figures, he unearths a fascinating alternate history of the city that raised him and explores the ways in which curtailed ambition, insufficiency, and loss shape all our lives. At once deeply personal and broadly erudite, it is a story of an art form (the movies), a city (Los Angeles), and one person's attempt to create meaning out of both. Above all, Specktor creates a moving search for optimism alongside the inevitability of failure and reveals the still-resonant power of art to help us navigate the beautiful ruins that await us all.

Many are mentioned in these pages, including Ford's extraordinary epic with the Cosworth engine and triumph at Le Mans. This volume also showcases portraits of drivers from François Cevert to Bruce McLaren, and touches on the careers of legendary designers such as Jean R d l , Colin Chapman and Jim Hall... In their lively commentary, Johnny Rives and Manou Zurini take evident pleasure in recalling old acquaintances from the pitched fever of the track, joyfully sharing their knowledge through anecdotes and memories. **The Car** Jun 30 2020 A spirited, insightful exploration of our favorite machine and its cultural impact on society over the past one hundred and fifty years. More than any other technology, cars have transformed American popular culture. Cars have created vast wealth as well as novel dreams of freedom and mobility. They have transformed our sense of distance and made the world infinitely more available to our eyes and our imaginations. They have inspired cinema, music and literature; they have, by their need for roads, bridges, filling stations, huge factories and global supply chains, re-engineered the world. Almost everything we now need, want, imagine or aspire to assumes the existence of cars in all their limitless power and their complex systems of meanings. This book celebrates the immense drama and beauty of the car, of the genius embodied in the Ford Model T, of the glory of the brilliant-red Mercedes Benz S-Class made by workers for Nelson Mandela on his release from prison, of Kanye West's 'chopped' Maybach, of the salvation of the Volkswagen Beetle by Major Ivan Hirst, of Elvis Presley's 100 Cadillacs, of the Rolls-Royce Silver Ghost and the BMC Mini and even of that harbinger of the end—the Tesla Model S and its creator Elon Musk. As the age of the car as we know it comes to an end, Bryan Appleyard's brilliantly insightful book tells the story of the rise and fall of the incredible machine that made the modern world what it is today.

[Backseat Driver](#) Dec 25 2019 Buying the safest car for your family shouldn't be up for debate. Yet for decades, car safety advocates, manufacturers, and lawmakers in the United States have clashed over

whether to make automobiles safer. All sides armed themselves with data in the hopes of winning the great car safety debates. **Car Country** Feb 25 2020 For most people in the United States, going almost anywhere begins with reaching for the car keys. This is true, Christopher Wells argues, because the United States is Car Country—a nation dominated by landscapes that are difficult, inconvenient, and often unsafe to navigate by those who are not sitting behind the wheel of a car. The prevalence of car-dependent landscapes seems perfectly natural to us today, but it is, in fact, a relatively new historical development. In *Car Country*, Wells rejects the idea that the nation's automotive status quo can be explained as a simple byproduct of an ardent love affair with the automobile. Instead, he takes readers on a tour of the evolving American landscape, charting the ways that transportation policies and land-use practices have combined to reshape nearly every element of the built environment around the easy movement of automobiles. Wells untangles the complicated relationships between automobiles and the environment, allowing readers to see the everyday world in a completely new way. The result is a history that is essential for

understanding American transportation and land-use issues today. Watch the book trailer: <http://www.youtube.com/watch?v=48LTKOxxrXQ>
